

ebizframe BI implementation at Steel Industry

Client Overview

Client is a steel manufacturing company which was incorporated in 1970 and restructured in 2015. Major products are – Round Bars, HRAP Squares, Cold Drawn squares ,HRAP Flats,etc.

They manufacture and market semi finished and finished specialty long steel products in stainless steel , Tool Steel , Alloy and special Alloy Steel, etc.

Implementation Objective

Client was earlier using Qlik BI with backend ERP Microsoft Dynamics AX2012. They were using Qlik desktop version and upgrading to Qlik sense was again a challenge for them with D365. The management dashboard was taking too much time to refresh also desired look and feel was not as per their desire.

The company was looking a solutions to remove all running challenges with current BI. They choose ESS as they found ESS had a good experience with BI into this vertical.

ESS helped them in removing all their challenges through ebizframe BI.

Solution Choice

The company evaluated several BI partner, and finally selected ebizframe BI because of its state-of-the-art technology, good track record, low entry and implementation cost, a clear implementation methodology and world-class processes.

Benefits achieved

- Easy integration with D365.
- Better dashboard with multiple dimensions with colour coding.
- User can easily navigate from graphs to tabular form of data.
- Improved report refresh time almost real time.
- Responsive view on multiple devises.
- Management are getting 360-degree view of their business.
- Anywhere ,anytime , accessibility .
- Quicker decisions, help in forming better strategy, reduced time to action.
- Reliable information with zero defect due to no manual intervention.
- Flexibility to move from one dimension to another.
- Detailed cause analysis.
- Improve on performance (like branch, customer category, group etc.)
- Flexibility to analyse the data for different dimension at the same time.

Transform your business with ebizframe BI

Functionalities

The company opted for ebizframeBI (powered by PowerBI) functionality where ESS developed required dashboard on PowerBI framework with a future options of ebizframe data warehouse for ease of further modifications and scaling up to new technology.

Below dashboard has been required by client:-

- Dispatch Analysis
- Sales Analysis
- Inventory Analysis
